Alexandr Khrustalev

Product interfaces, reporting tools and digital workflows

Pattaya, Thailand, UTC+7 | leshadqq@gmail.com

sandersaxbuilds.github.io/selected-work

PROFILE

Cross-disciplinary digital professional with practical business experience and independent work in responsive interfaces, small web applications, data review and reporting. I turn operational requirements into working screens, explicit data rules and reviewable handoffs.

RELEVANT INDEPENDENT WORK | 2026

LedgerLens | CSV reporting workspace

Designed and implemented a reporting interface with schema validation, source-row traceability, exact-cent reconciliation and exception review. Tested calculations and custom CSV behavior. Demonstration uses fictional order and refund data.

Expense review | Mobile interface concept

Built an interactive expense-review concept with search, filtering, approval feedback and correction requests. Added undo, reset, keyboard focus and Escape behavior, and checked phone layouts. Independent concept with synthetic records.

Countback | Receiving and correction history

Built a browser receiving workflow that converts cartons to units, records damage and shortages, and retains count corrections. Independent prototype using synthetic orders.

BUSINESS EXPERIENCE

ALLEX RESPECT ASIA | Business and product contributions

April 2018 to present

Active contributions to a Kazakhstan-based product business across supplier communication, sourcing, packaging, product documentation, catalogues, commercial research, spreadsheets and logistics coordination.

CAPABILITIES

Workflow and information structure, responsive HTML/CSS, JavaScript interactions, small web tools, CSV and spreadsheet reporting, input validation, debugging and practical QA. Source-backed demonstrations and tested behavior accompany the portfolio.

LANGUAGES

English and Russian fluent. Thai conversational.

The portfolio projects above are independent demonstrations, not commissioned product-design engagements. October 2026.
